## Nitrogen Use Efficiency.

MCDDG Group  
Feb 2<sup>nd</sup> 2016

Peter Beale,  
SLSO Pastures, Taree

[www.lls.nsw.gov.au/hunter](http://www.lls.nsw.gov.au/hunter)

## Thanks too.....

- Marguerite White and Dairy Australia
- NHP funding
- James Neal
- Kevin Williams and Allan Mudford
- PGGWrightsonseeds
- LLS Support
- Elders Scot Burley
- Josh Hack Dairy Australia
- Support Group – Yani, Neil, Richard etc

[www.lls.nsw.gov.au/hunter](http://www.lls.nsw.gov.au/hunter)

## Issues

- Variation in N prior to sowing ryegrass
- Impact of kikuyu on ryegrass
  - Trash
  - N rate
  - Leaching on permeable soils
  - Soil moisture on growth
- Transition Issues
  - N rates
  - Insects

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

## Further Issues

- How do we measure all that?
- Soil Tests
- Tissue Tests

Optical Senses: – Urine stains to Paddock?

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

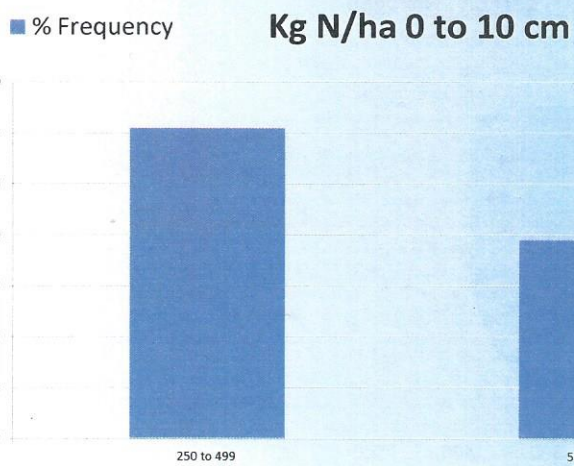

### Landscan 2014: Total Soil N – 0 to 10 cm

113 samples taken March April 2014

[www.ils.nsw.gov.au/hunter](http://www.ils.nsw.gov.au/hunter)

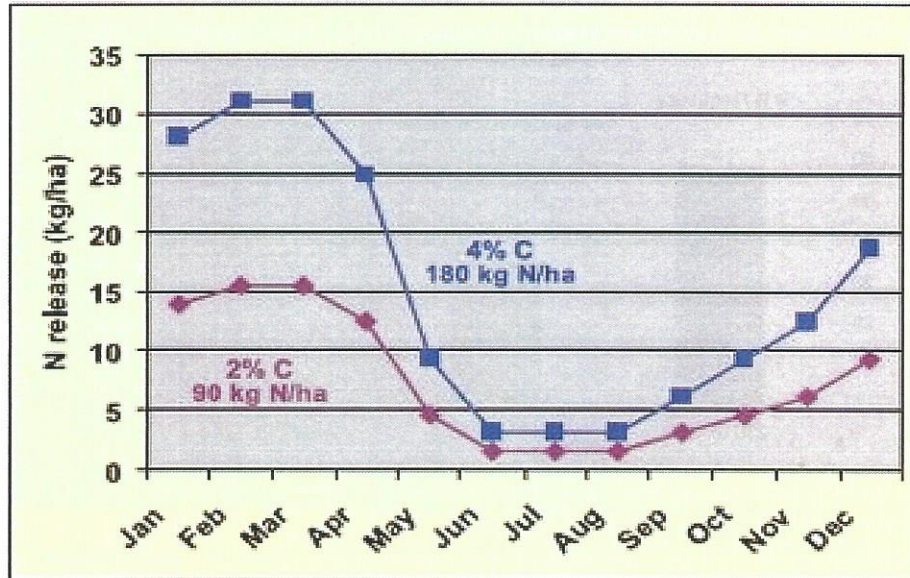

### Fert\$mart 2015: Total Soil N – 0 to 10 cm

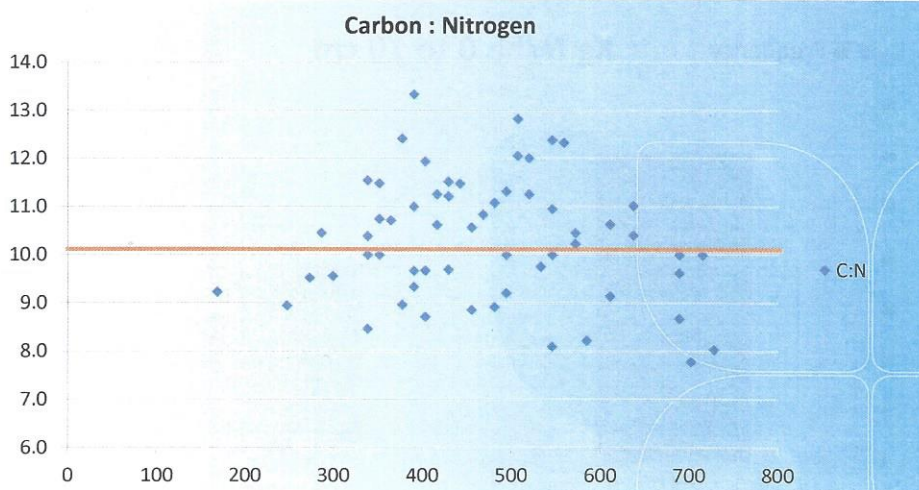

64 samples

[www.ils.nsw.gov.au/hunter](http://www.ils.nsw.gov.au/hunter)

**Figure 3:**  
 Predicted total and monthly nitrogen (N) release from the soil organic matter in two soils differing in organic carbon (C) contents.

**N availability related to C:N**

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

**Figure 1** Relationships between grass yield, nitrogen supply and summer rainfall in the subtropics and tropics of Queensland, Australia. (Unpublished and published data collated from 31 sites provided by the authors, D.A. Ivory, C.P. Miller, and R.T. Cowan)

### Nitrogen Rate over kikuyu phase

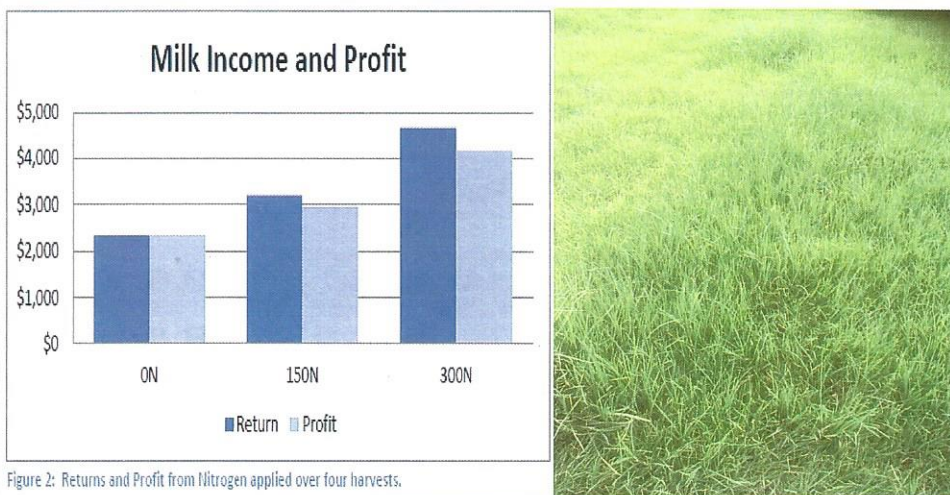

Figure 2: Returns and Profit from Nitrogen applied over four harvests.

[www.lls.nsw.gov.au/hunter](http://www.lls.nsw.gov.au/hunter)

## Two components Quantity & quality

## Low N – insufficient leaf growth by 4.5 leaf

Metabolisable Energy  
Mj ME/kg DM

N Rate (Kg N/ha)	0	150	300
9/1/2015	7.7	8.1	8.5
2/2/2015	7.9	8.0	8.6
28/2/2015	8.1	8.6	8.8
24/3/2015	8.2	9.1	9.0
<b>Ave ME</b>	<b><u>8.0</u></b>	<b><u>8.4</u></b>	<b><u>8.7</u></b>

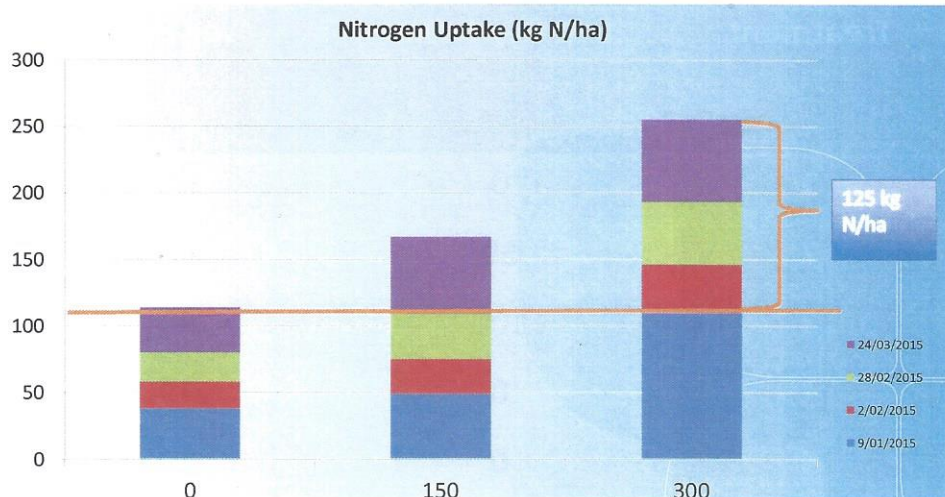

[www.ils.nsw.gov.au/hunter](http://www.ils.nsw.gov.au/hunter)

### NDF Affects

NDF %		
0	150	300
58	58	56
58	59	57
59	58	58
57	55	55
<u>58</u>	<u>58</u>	<u>56</u>

www.lis.nsw.gov.au/hunter

### Nitrogen Uptake kg N/ha ( = leaf N% \* DM)

www.lis.nsw.gov.au/hunter

### Total Yield – Cuts 1 to 3 higher in high N

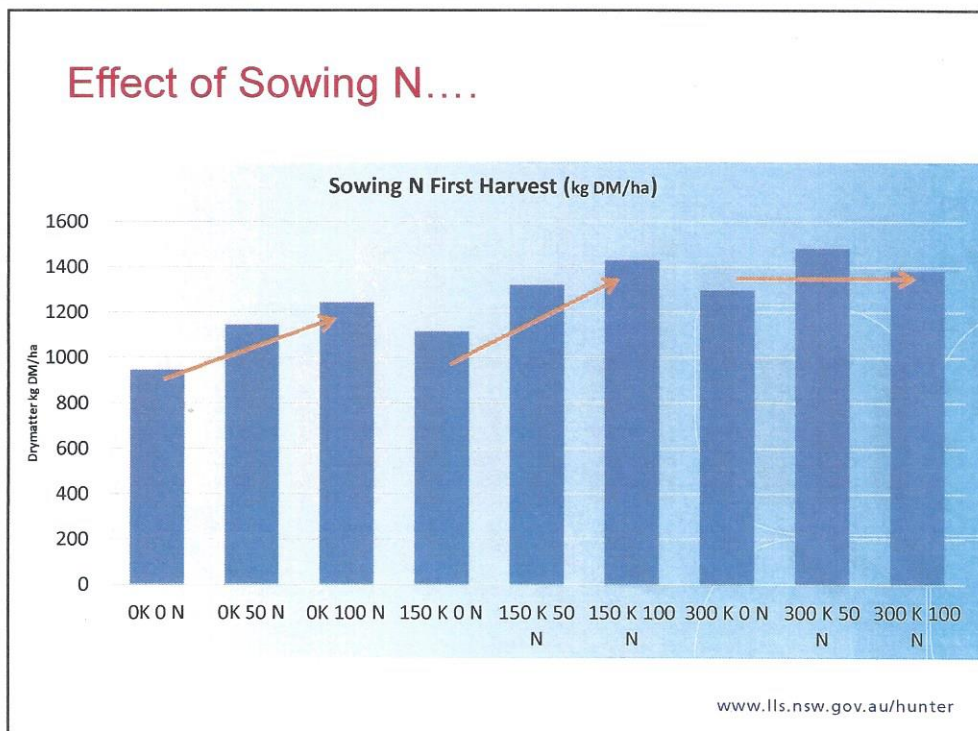

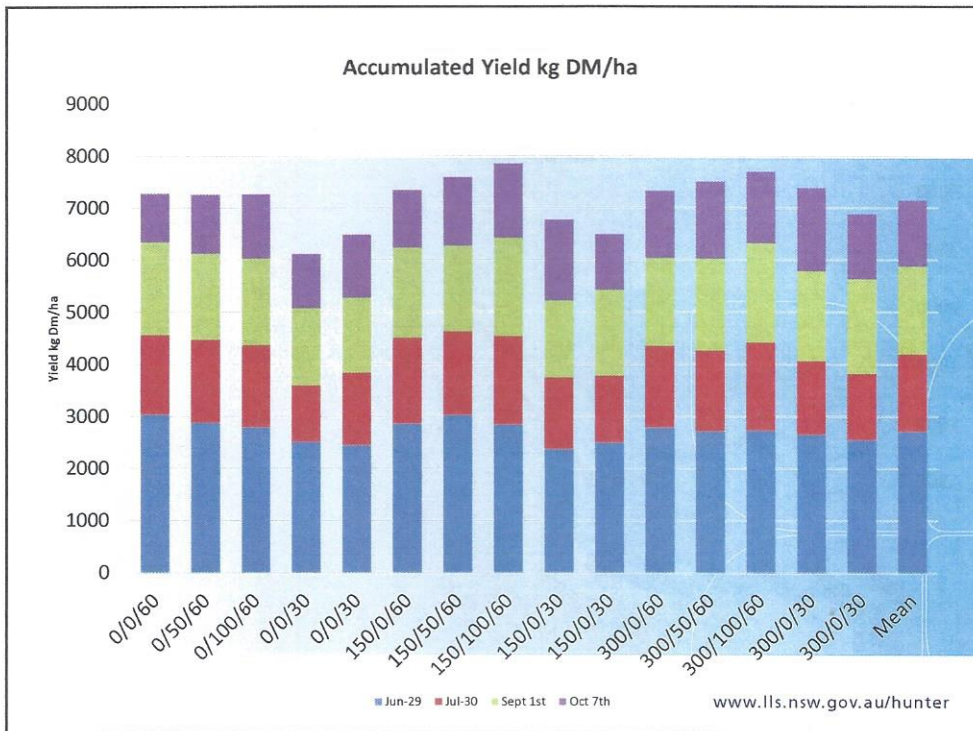

### Ryegrass Treatments

Treatment	At Rye Sow	Veg Rye
1	0	60
2	50	60
3	100	60
4	0	30
5	0	30

www.ils.nsw.gov.au/hunter

## Trash or stubble management

- Spraying vs Mulching
  - Decomposition of stubble releases N
  - Reduced N demand from kikuyu
- Bulk left to decompose
- C:N ratio
- Leaching on permeable soils

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

## Soil Moisture – N use and demand

- High rainfall - high growth – low N reserves
- Low Rainfall – low growth – excess N for Rye

**Figure 1** Relationships between grass yield, nitrogen supply and summer rainfall in the subtropics and tropics of Queensland, Australia. (Unpublished and published data collated from 31 sites provided by the authors, D.A. Ivory, C.P. Miller, and R.T. Cowan)

## How to measure this

Urine Stains = Control

Ratio of Urine to Paddocks?????

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

## Transition Issues

[www.lis.nsw.gov.au/hunter](http://www.lis.nsw.gov.au/hunter)

### Concord 2 much better establishment.....

[www.ils.nsw.gov.au/hunter](http://www.ils.nsw.gov.au/hunter)

### Late Concord held back kikuyu

[www.ils.nsw.gov.au/hunter](http://www.ils.nsw.gov.au/hunter)
