

PREVENTING COVID-19 SPREAD DURING MILKING

TO KEEP PEOPLE ON OUR FARM SAFE AND WELL, IT'S
IMPORTANT TO FOLLOW COVID-19 HYGIENE PROCEDURES

Version 1 - Friday 27 March 2020

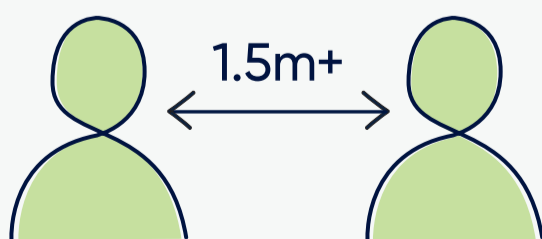

- 1** **Wear gloves** from the start to the end of the entire milking process including vat hook-up and detachment. Keep gloves on until you leave the dairy.

- 2** At the end of each row, or half turn on a rotary, **spray** your **milking gloves** with **teat disinfectant** or **70% alcohol**.

- 3** **Wipe down/spray with disinfectant** any jointly used pieces of milking equipment post-milking.

- 4** **Stay more than 1.5m (or at least 3 bails) apart** at all times, preferably on opposite sides of the bridge.
